

► Hair Removal With Nufree® Nudesse® - finipil®

Strictly professional product. Licensed beauty professionals only. Refill products sold to registered salons that have a Nufree Professional Servicercenter.

Developed over 30 years ago to remove hair from a patient before plastic surgery, nothing is more effective & safe than Nufree... the "gold standard" in hair removal. Nufree is safe for over 98% of the body and is approved for both Brazilians and Guyzilians®. Nufree is the only antimicrobial, non-wax hair removal system in the world. Because it's not a wax, Nufree never sticks to the skin; so your clients won't experience the pain, redness or swelling of typical wax treatments... only silky, smooth skin. Nufree actually uproots the entire bulb and hair shaft and doesn't break the hair off the way depilatories and waxes do. Nufree repels moisture (anhydrous), that's why it never evaporates, giving you more services per pound, while continuing to stay antibacterial. Clinically developed for sensitive skin!

Patented antibacterial & antimicrobial finipil is applied after the hair is removed. finipil protects against ingrown hairs and bacteria. When combined with Nufree and used daily, it extends the period between hair removal treatments and helps to stagnate regrowth.

Make sure you register your Nufree Thermal Unit! We refer hundreds of customers to salons every week!

Nufree® Nudesse® finipil® versus other brands of hair removal

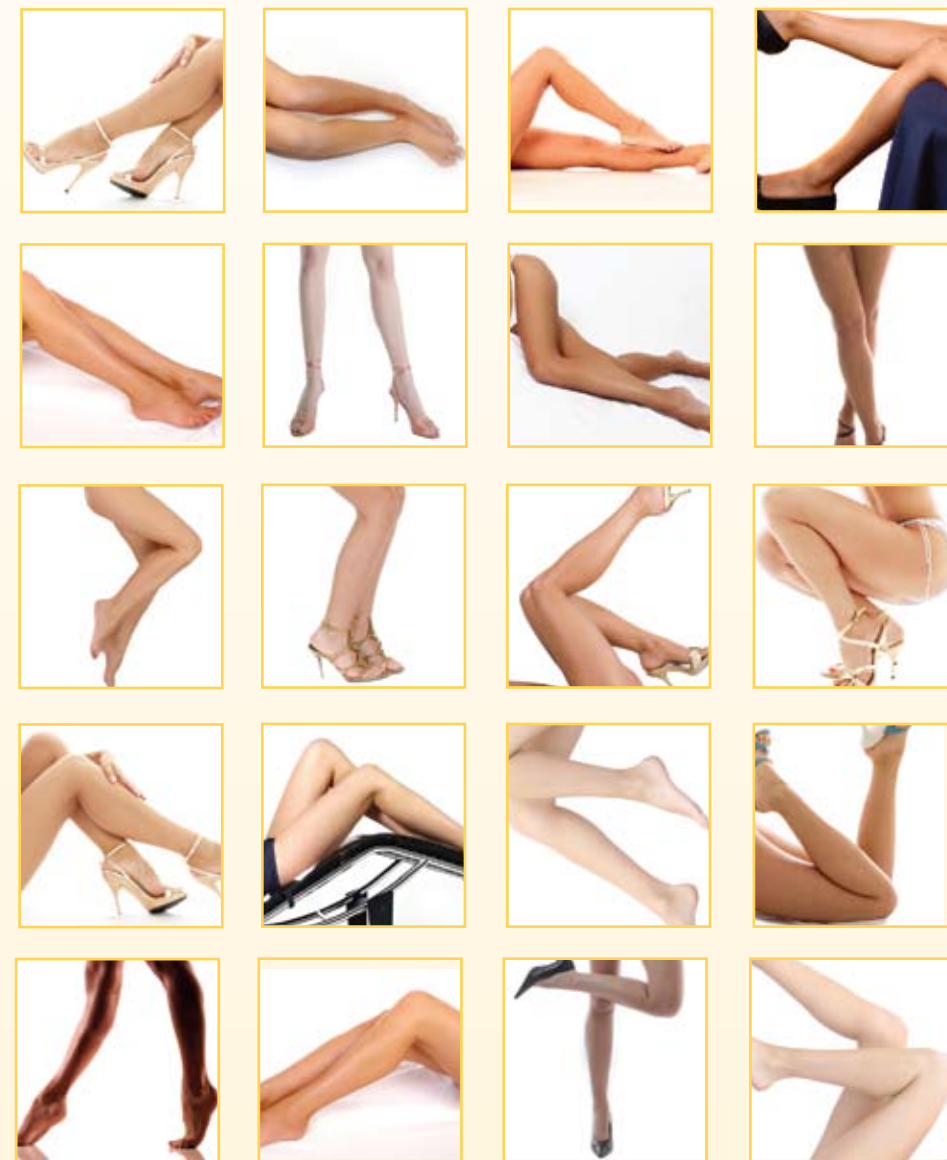

Nufree Nudesse Hair Removal

- 100% botanical - no chemicals, no sugar, no wax.
- Bonds with hair only. 75% less painful.
- Removes entire hair, root, bulb and shaft each time - no stubble.
- Liquifies at body temperature, easy super thin application that gives more value per ounce. Stays Liquid. Never dries.
- No prior preparation. Applies easily - no waiting. Put it on, take it off.
- It's odorless.
- Can be used for 98% of the body.
- The only Antibacterial / Antimicrobial & Anhydrous hair removal system.
- Is erasable. Easily removed from skin & hair with Erasing Lotion if there is an error. All Natural.
- Clean hair removal station easily with Erasing Lotion.
- Certified Clinical Studies.

wax, sugar & honey products

- Contains chemical additives.
- Wax sticks to skin. Can not be reapplied.
- Can cause painful irritation when removing.
- Breaks up to 60% of hair shafts and can leave stubble.
- Has a molasses consistency - can be over heated which can cause 3rd degree burns.
- Drying time 5-10 minutes. Skin must be treated prior to application.
- Can harbor bacteria.
- Can only be used on 60% of the body. No underarm, No breast hairs etc.
- Once a mistake is made, it's difficult to remove.
- Hair shafts have to be cut, leaving voids.
- Very messy. Service area difficult to clean.
